

Project 5

- MongoDB Compass connect string to your Atlas server
 - `mongodb+srv://ShabaniBashar:Shabani01@cluster0.wib3tg3.mongodb.net/test`
- Explanation of additional features, if any.
 - I added no additional features, other than what was required of me.
- Explanation of status, stopping point, and issues if incomplete.
 - I had issues with fully implementing the RSVP functionality. I struggled quite a bit with getting it to function properly and save in my database.
- Discuss the easy and challenging parts of the assignment. How did you overcome all or some of the challenges?
 - The project was pretty difficult. I struggled quite a bit with getting it to function properly and save in my database. I tried my best to overcome this struggle, but I was not able to 100% implement the RSVP functionality. I was able to implement the security measures though.
