2. I did not add any additional features.
3. The status of the project is completed. I had no issues with completing the project.
4. Since I had already taken ITIS-3135 in the past and I also do code in my free time for personal progression I didn't face many challenges. The only real challenge that I was stumped on for a little while was getting the general site navigation under the header. I overcame this by reading over a CSS textbook I have and playing around with the CSS a little bit until I got the general site navigation to how I wanted it.
